

Federal Capabilities Document

CAPABILITIES

Composite Software, Inc. is the only company that focuses solely on data virtualization.

Today, our data virtualization middleware integrates data from multiple, disparate sources - anywhere across the extended enterprise – in a unified, logically virtualized manner for consumption by nearly any front-end business solution, including reports, portals, mash-ups, applications, search, and more.

Scaling from project to enterprise, Composite's middleware enables data federation, data warehouse extension, enterprise data sharing, real-time and cloud computing data integration.

Founded in 2002, Composite Software is a privately held, venture-funded corporation based in San Mateo, CA.

WHY COMPOSITE?

Customers, industry analysts and respected technical journalists claim our data virtualization platform is the most innovative and advanced in the market today.

Global organizations faced with disparate, complex data environments, have chosen Composite's proven data virtualization platform to fulfill critical information needs, faster with fewer resources.
